

# POUCH DRYER

More effective and reliable drying solutions  
for hard-to-reach areas

The Pouch Dryer effectively and efficiently removes water trapped on the top, bottom and gussets of pouches using maximum efficiency air knives and nozzle manifolds. Paxton Products combines their high-performance air delivery systems with their best-in-class centrifugal blowers to create a custom-engineered solution, specific for every application need, to dry any pouch. The process begins with defining your conveyor speed, pouch size and how much water needs to be removed —to specify your solution.

## FEATURES

- Thoroughly dries the top, bottom and gusset of pouches
- Eliminate oversaturated pouches and damaged boxes
- More accurate weighing
- Adapts to any conveyor line speed
- Powered by Paxton PX-series Blower
