

# BLOWER ENCLOSURES

Significantly reduce noise levels while protecting your blower from water, dirt, and other environmental factors during washdown. Blower installation is simplified, and maintenance is facilitated by easy access doors on two sides.

Small Footprint Enclosure

Designed for durability and easy maintenance and installation, Paxton's washdown-duty acoustical blower enclosures protect the blower from harsh environments. The rugged polypropylene enclosure reduces sound levels to within OSHA standards, and the design has no crevices that hold in moisture – significantly reducing the potential for bacteria growth.

PX-Series Enclosure

- Protects in harsh, corrosive, and wet environments
- Significant sound abatement
- Simplifies blower installation and maintenance
- Maintains lower blower temperatures for optimum performance
- Significantly reduces noise levels
- Protect blower from dirt, water, corrosivity, and more
- Optimizes blower temperature & performance

**DURABLE AND FUNCTIONAL**

Welded Polypropylene Enclosure

304 Stainless Steel Base

Clear, Oversized Lexan Doors for Easy Servicing

# FEATURES

- PX-Series blower enclosures include removable, reusable, and washable mesh pre-filters that trap larger airborne particulates, extending the service life of the blower inlet filter
- Strong, polypropylene enclosure that withstands harsh, wet and corrosive environments
- Durable 304 Stainless Steel Base
- Available in 9" and 24" high base models
- Oversized, clear Lexan access doors for easy servicing: no need to disturb ducting to inspect or service the blower
- Half-turn, fast-lock access door fasteners
- Shipped with blower pre-mounted to allow for quick, turnkey installation
- Designed for movement and placement by fork lift
- Swivel Style (adjustable) leveling feet with anchoring holes
- O-ring sealed sanitary discharge pipe, 3 or 4 inches
- No crevices to hold moisture
